

ZELight

Zero Carbon Lighting System

Solar Source Ltd partners have over 15 years expertise in the solar photovoltaic stand-alone / hybrid systems. We provide a range of **ZELight** standalone PV and wind powered lighting solutions ideal for both urban and rural locations.

The **ZELight** range includes systems for car park lighting, street lighting and off-grid exterior lighting. A range of bespoke mounting designs are available to suit different projects and we offer a variety of luminaires to suit different applications including SOX, DC & LED.

Our **ZELight** lighting systems can be highly cost competitive in situations where cable-trenching costs can be avoided. They provide a low-energy, low carbon, low maintenance solution.

Advantages over conventional grid-connected lighting systems include:

- No cable trenching required.
- Reduced CO₂ compared with conventional lights.
- Low maintenance.
- Ideal for urban and rural applications .

In addition to our standard products we offer a turnkey service from design to installation and maintenance.
